It has been accepted for inclusion in All Sepsis Education Materials by an authorized administrator of Providence Digital Commons. For more information, please contact digitalcommons@providence.org.

Understanding Your Sepsis Diagnosis

- 坐上一辆救护车

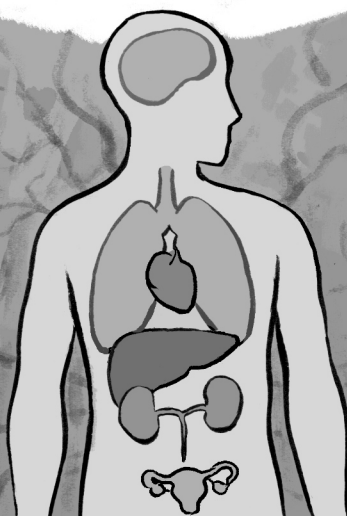

正常情况下，我们的免疫系统会帮助我们对抗感染。

败血症是由于免疫系统失控导致。

当人体试图与感染对抗时，它会袭击整个身体。

急救中心的医护人员从您的症状和生命体征中发现败血症的迹象。

发冷
发烧
心跳加快
意识模糊
头晕
低血压
红肿

您病得很重。

是的。败血症会危及生命。

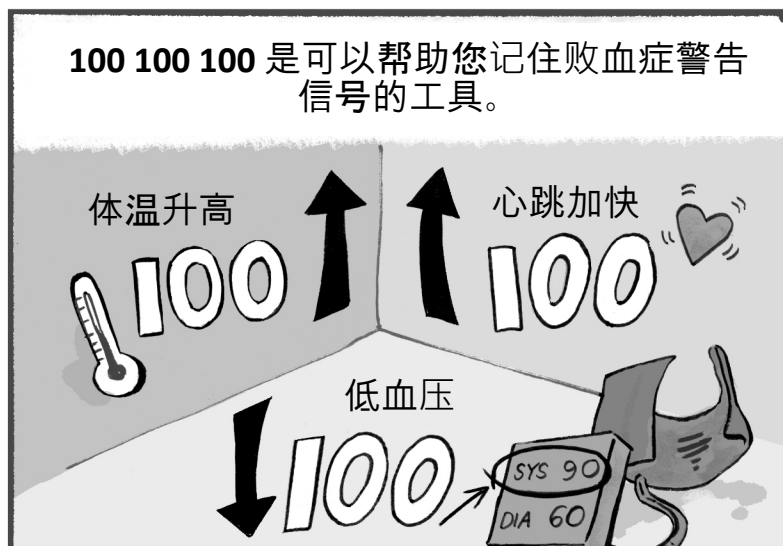

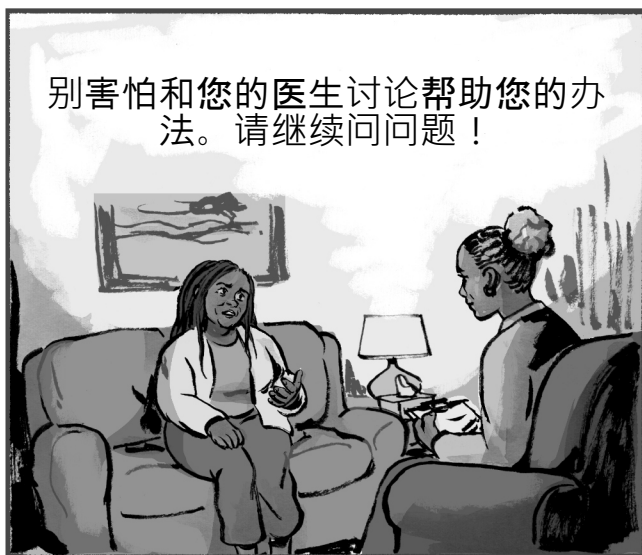

这就是我们迅速行动的原因——提供药物、进行检查、频繁测量生命体征并密切观察您的情况。

我现在应该回家吗？
我还是感觉不舒服.....我还在生病吗？

在您恢复健康的旅途中，您的护理团队为您保驾护航。
