

Providence System Nurse Research and Clinical  
Scholarship Symposium 2024

*Clinical Inquiry: The Catalyst to Nursing  
Excellence*

# Managing Sepsis with qSOFA

Jeana Rockette Adams, DNP, RN, CCRN, TCRN  
Providence Holy Cross Medical Center

# Background and Problem Statement

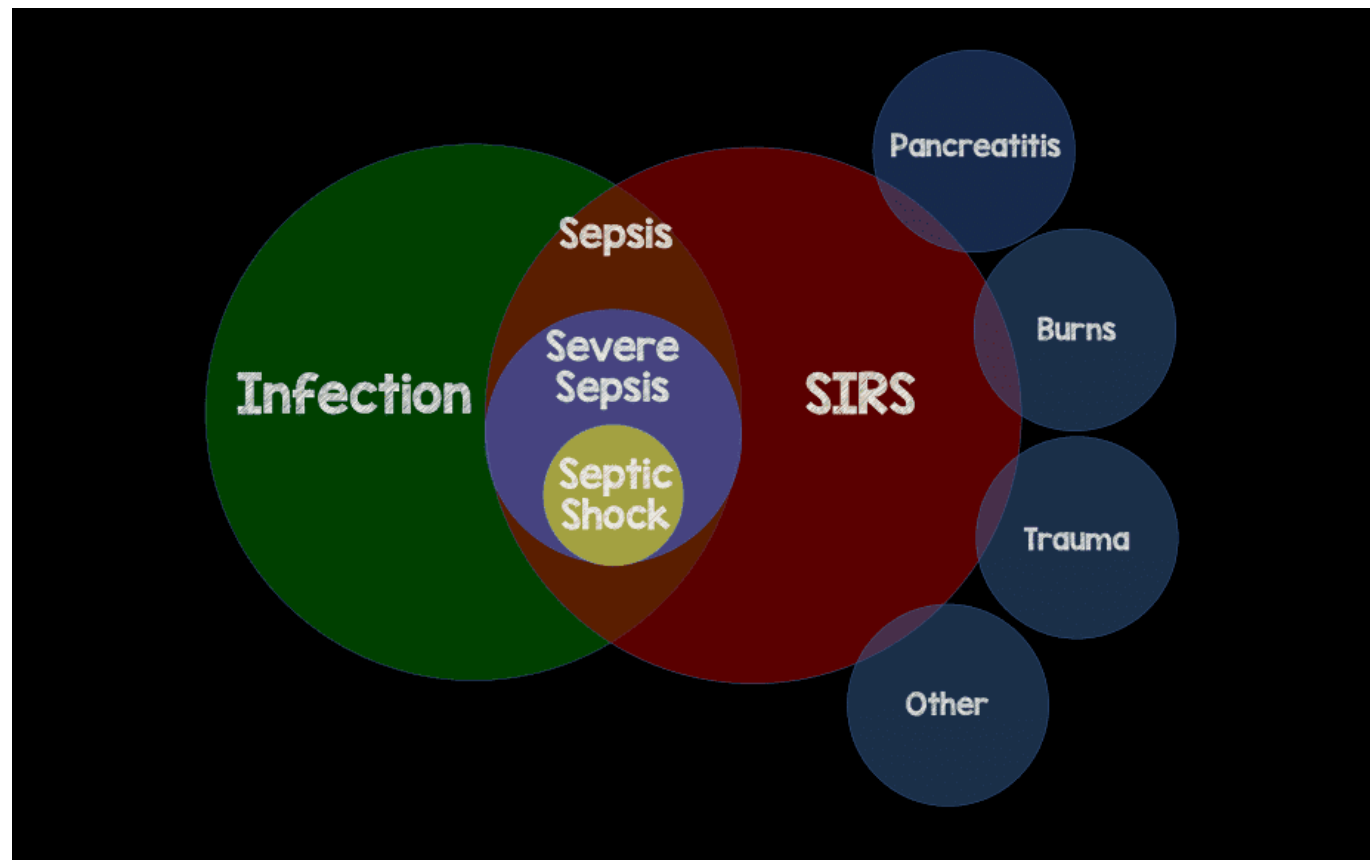

# Clinical Question and Project Aims

Among sepsis patients in an acute care facility on the Neurological/Telemetry Unit, does addition of the quick Sequential Organ Failure Assessment (qSOFA) influence sepsis recognition when compared to the Systemic Inflammatory Response Syndrome (SIRS) criteria alone?

## Measurable Outcomes

Antimicrobial administration time from the time sepsis criteria had been met before and compared with after project implementation

[This Photo](#) by Unknown Author is licensed under [CC BY-NC-ND](#)

# Inclusion and Exclusion Criteria

## Inclusion Criteria

- Adult (>18 years of age)
- Inpatient (implementation unit)
- Meet sepsis criteria

## Exclusion Criteria

- Minor (<18 years of age)
- ED patients prior to admission status, ICU patients, patients admitted to floors other than the implementation unit
- Non-septic, don't meet SIRS criteria

# Methods

- Quality improvement pre-post intervention project.
- Goal to help nurses recognize sepsis earlier and administer antimicrobials sooner.
- Nurses were educated on how to find and interpret the qSOFA as an additional strategy to using SIRS criteria.

[This Photo](#) by Unknown Author is licensed under [CC BY-NC-ND](#)

# Analysis of Data

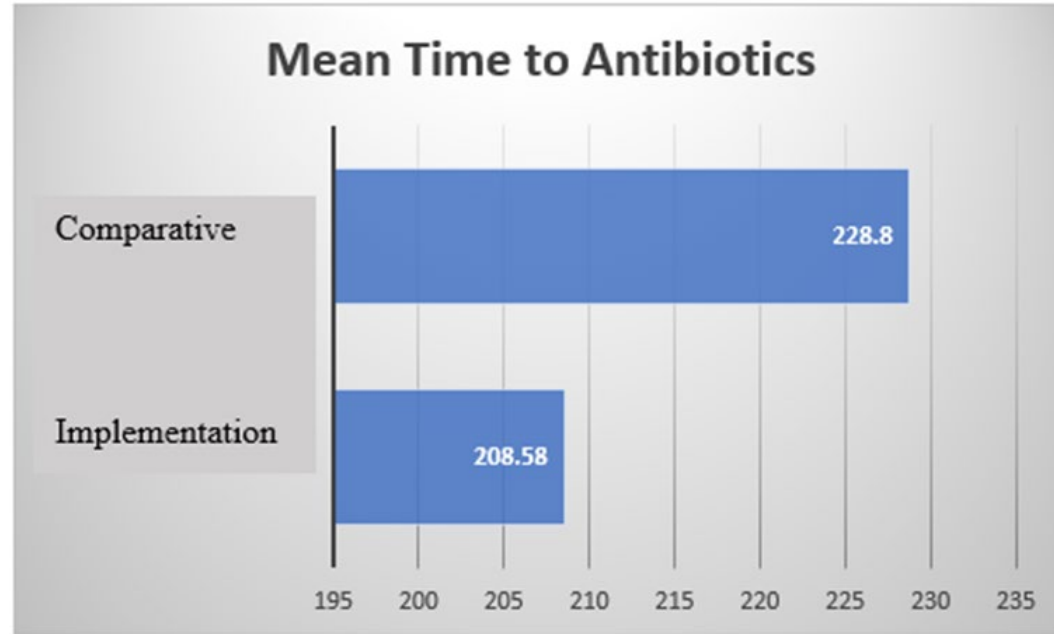

- **Aim: To compare average time to antimicrobial administration in sepsis patients from before to after project implementation.**
- Data were extracted from the electronic health record. The times to antimicrobial administration were averaged.
- An independent  $t$ -test was used to evaluate the data.

# Discussion

**Descriptive Statistics – Antimicrobial Administration Time (minutes)**

|                | N  | Minimum | Maximum | Mean   | SD    |
|----------------|----|---------|---------|--------|-------|
| Comparative    | 7  | 10      | 788     | 228.4  | 318.9 |
| Implementation | 13 | 8       | 915     | 208.58 | 257.6 |

# Clinical Implications

- Early sepsis recognition
  - SIRS
  - qSOFA
- Next steps

Questions?
